FELIPE SILVA

Senior Software Engineer (.NET / Full-Stack)

C# | .NET | ASP.NET Core | REST APIs | SQL Server | EF Core | Azure | React | TypeScript | Docker | CI/CD

Madrid, Spain | +34 657 99 00 70 | contact@felipewrsilva.dev | linkedin.com/in/felipewrsilva | felipewrsilva.dev

PROFESSIONAL SUMMARY

Senior .NET engineer in Madrid with 10+ years in C#, ASP.NET Core, SQL Server, and REST APIs. I own production backends end to end: Azure, EF Core, Docker where the delivery path needs it, GitLab CI/CD and Azure DevOps, code review, and mentoring on the team path. Full-stack when the product needs one owner: React, Next.js, and TypeScript at Afya, plus Razor Pages operator UIs at IQVIA. Day-to-day delivery includes AI coding assistants (Copilot and similar) on .NET work.

TECHNICAL SKILLS

Languages	C#, SQL, T-SQL, TypeScript, JavaScript
Backend	.NET, ASP.NET Core, Web API, REST APIs, EF Core, Identity, CQRS, Clean Architecture, Microservices, Docker
Frontend	React, Next.js, TypeScript, Razor Pages, jQuery
Cloud & data	SQL Server, Azure (App Service, Functions, Blob, SQL), AWS (Lambda, SNS, SQS), MongoDB
Delivery	GitLab CI/CD, Azure DevOps, Code review, Mentoring, AI-assisted development

PROFESSIONAL EXPERIENCE

IQVIA

August 2020 - Present

Senior Software Engineer | Healthcare technology

- Cut largest-file runtime from 3+ hours or failure to under 20 minutes on a C#, .NET, EF Core, and SQL Server ingestion path under deadlock and timeout pressure.
- Built ASP.NET Core REST APIs and Razor Pages operator tooling with Identity, CQRS, jQuery, and AdminLTE for production operators.
- Shipped a live extract path in Go, Azure Functions, Blob Storage, and Databricks that replaced SSIS and a manual CSV path. Cut routine production support time by 75%.
- Ran GitLab CI/CD and Azure DevOps for app and SQL Server schema delivery, with code review on the same path as application changes.
- Mentored peers on production RCA and delivery standards while owning live ingestion and extract paths under volume.

Fidelis Security

April 2018 - July 2020

Senior Software Engineer | Enterprise security

- Led the backend OS migration so the product ran in customer environments that previously blocked upgrades.
- Built partner REST APIs and moved async work to AWS Lambda, SNS, and SQS service boundaries, cutting recurring integration defects.

Afya

May 2017 - March 2018

Senior Software Engineer | Healthcare education

- Built checkout and acquisition end to end in TypeScript, Next.js, React, Node.js, MongoDB, and AWS, including payments, contracts, and production support.
- Raised conversions by 12% and checkout throughput by more than 80% after an AWS modernization and zero-downtime cutover.

Levilo

February 2016 - April 2017

Software Engineer | SaaS

- Re-architected a desktop product as SaaS on ASP.NET Razor Pages, jQuery, and AdminLTE. Monthly churn fell from 18% to 3%.
- Operated cloud infrastructure for more than 5,000 active client operations during the cutover.

Senac

January 2015 - January 2016

Software Engineer | Education

- Launched student payments with ASP.NET Core Identity and replaced manual invoice support with self-service.

EDUCATION

University of Sao Paulo (USP)

January 2019 - December 2022

Bachelor's degree in Information Systems

Sorocaba College of Engineering (Facens)

January 2014 - December 2018

Computer Engineering
