### PROFESSIONAL SUMMARY

Senior Software Engineer in Madrid with 10+ years building and operating production systems in healthcare, education, enterprise security, and SaaS. Primary stacks: C# / .NET, TypeScript, and Go. Authorized to work in Europe.

Work spans backend, frontend, and full-stack delivery, plus data platforms and cloud infrastructure on systems already serving customers.

---

### CORE TECHNOLOGIES

**Languages** C#, TypeScript, JavaScript, Go, SQL

**Backend** .NET • ASP.NET Core • Node.js • REST APIs

**Frontend** HTML • CSS • JavaScript • TypeScript • React • Next.js • ASP.NET

**Cloud & Data** SQL Server • MongoDB • AWS (Lambda, SNS, SQS) • Azure • Databricks • Parquet

---

### PROFESSIONAL EXPERIENCE

#### IQVIA

Aug 2020 to Present

Senior Software Engineer • Healthcare technology • Pharmaceutical and healthcare data customers

Backend and data platform engineering for high-volume healthcare and pharmaceutical data used across multiple markets.

- Stabilized a high-volume file path after SQL deadlocks, timeouts, and 3+ hour or failed runs on the largest files. Every file now finishes within 20 minutes, usually faster, while ingesting dozens of very large files per hour.
- Built a live extract pipeline in Go that replaced SSIS and a manual CSV/Spark/SQL Server path with FTP watch, Parquet, Azure Blob, and analyst-triggered Databricks loads in minutes.
- Built GitLab CI/CD and DACPAC versioning with automated pre-deploy and drift reports.
- Cut routine developer support time by 75% through RCA-driven production fixes.

#### Fidelis

Apr 2018 to Jul 2020

Senior Software Engineer • Enterprise security • Enterprise customers on multiple operating systems

Backend work on a cross-platform enterprise security product, including OS migration and partner integrations.

- Led backend work for an OS migration so the product ran reliably across customer environments that previously blocked upgrades.
- Repaired partner integrations and built Go tooling for simulation and alerts around failing cybersecurity partner connections.
- Moved partner and processing workloads that needed async fan-out onto AWS Lambda, SNS, and SQS.

#### Afya

May 2017 to Mar 2018

Senior Software Engineer • Healthcare education • Checkout and customer acquisition users

Full-stack work on the checkout and customer acquisition platform for a major Brazilian healthcare education company.

- Built and operated end-to-end checkout and acquisition flows in TypeScript, Next.js, React, Node.js, MongoDB, and AWS, including payments, contracts, and production support.
- Led AWS modernization of the acquisition platform, improving conversion and throughput without downtime for live users.

## Levilo

Feb 2016 to Apr 2017

Software Engineer • SaaS • Users migrating from desktop to web

Full-stack and cloud work that moved a desktop product to SaaS for active clients.

- Migrated a legacy desktop product to SaaS and operated cloud infrastructure for thousands of active client operations.

## Senac

Jan 2015 to Jan 2016

Software Engineer • Education • Students managing invoices and payments

Full-stack delivery of education payment tools and self-service invoice flows.

- Launched an education payment platform end to end and replaced manual invoice support with self-service.

## EDUCATION

---

### University of São Paulo (USP)

Jan 2019 to Dec 2024

Bachelor of Information Systems

### Sorocaba College of Engineering (Facens)

Jan 2014 to Dec 2018

Computer Engineering studies
